INDEPENDENT AUDITOR'S REPORT

The Honorable Katherine Freeman, Mayor
and Town Council
Town of Logansport, Louisiana

I have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Town of Logansport as of and for the year ended December 31, 2009 which collectively comprise the Town's basic financial statements as listed in the table of contents. *These financial statements are the responsibility of Town of Logansport's, management.* My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with auditing standards generally accepted in the United States of America, and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the basic financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, business-type activities, major funds, and remaining fund information of Town of Logansport, Louisiana as of December 31, 2009, and the changes in financial position and cash flows, where applicable, of those activities and funds for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The management's discussion and analysis presented on pages 3 through 7 and the budgetary information on page 25 are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. I have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, I did not audit the information and express no opinion on it.

In accordance with Government Auditing Standards, I have also issued a report dated June 3, 2010 on my consideration of Town of Logansport's internal control over financial reporting and my tests of its compliance with certain provisions of laws, regulations, contracts and grants agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Governmental Auditing Standards and should be considered in assessing the results of my audit.

My audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Town of Logansport's basic financial statements. The accompanying supplemental schedules listed in the table of contents as other supplementary information are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in my opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

OVERVIEW OF THE FINANCIAL STATEMENTS

The following graphic illustrates the minimum requirements for the Town of Logansport as established by Governmental Accounting Standards Board Statement 34. Basic Financial Statements and Management's Discussion and Analysis - for State and Local Governments.

These financial statements consist of three sections - Management's Discussion and Analysis (this section), the basic financial statements (including the notes to the financial statements), and required supplementary information.

This annual report consists of a series of financial statements. The Statement of Net Assets and the Statement of Activities (on pages 8 and 9) provide information about the activities of the Town of Logansport as a whole and present a longer-term view of the Town's finances. Fund financial statements start on page 10. For governmental activities, these statements tell how these services were financed in the short term as well as what remains for future spending. Fund financial statements also report the Town's operations in more detail than the government-wide statements by providing information about the Town's most significant funds.

Reporting the Town as a Whole

The Statement of Net Assets and the Statement of Activities

One of the most important questions asked about the Town's finances is, "Is the Town as a whole, better off or worse off as a result of the year's activities?" The Statement of Net Assets and the Statement of Activities report information about the Town as a whole and about its activities in a way that helps answer this question. These statements include all assets and liabilities using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

OVERVIEW OF THE FINANCIAL STATEMENTS (CONTINUED)

These two statements report the Town's net assets and changes in them. You can think of the Town's net assets, the difference between assets and liabilities, as one way to measure the Town's financial health, or financial position. Over time, increases or decreases in the Town's net assets are one indicator of whether its financial health is improving or deteriorating.

In the Statement of Net Assets and the Statement of Activities, we divide the Town into two kinds of activities:

Governmental Activities

Most of the Town's basic services are reported here including the police and general administration. Taxes, license and permits, fines, interest income and state and federal grants finance most of these activities.

Business-Type Activities

The Town charges a fee to customers to help it cover all or most of the cost of certain services it provides. The Town's water and sewer systems are reported here.

Reporting the Town's Most Significant Funds

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds, not the Town as a whole. Some funds are required to be established by State law and by bond covenants. However, the Town Council may establish other funds to help it control and money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants and other money. The Town's two kinds of funds, governmental and proprietary, use different accounting approaches.

Governmental Funds

Most of the Town's basic services are reported in governmental funds, which focus on how money flows into and out of those funds and the balances left at year end that are available for spending. These funds are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short term view of the Town's general governmental operations and the basic services it provides. Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the Town's activities as well as what remains for future spending.

Proprietary Funds

When the Town charges customers for the services it provides, these services are generally reported in proprietary funds. Proprietary funds are reported in the same way that all activities are reported in the Statement of Net Assets and Statement of Activities. In fact, the Town's enterprise funds are the same as the business-type activities we reported in the government-wide statements but provide more detail and additional information, such as cash flows.

TOWN OF LOGANSPORT, LOUISIANA
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN
FUND BALANCE OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
FOR THE YEAR ENDED DECEMBER 31, 2009

Net Changes in Fund Balances - Total Governmental Funds \$ 249,408

The change in Net Assets reported for governmental activities in the statement of activities is different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation (38,861) exceeds capital outlay (27,834) (11,027)

Governmental fund report principal repayments as expenditures. However, these amounts are not included in the statement of activities but reduces the liability in the statement of net assets. Those expenditures consists of:

Principal payments on long-term debt 11,000

Change in Net Assets of Governmental Activities \$ 249,381

TOWN OF LOGANSPORT, LOUISIANA
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2009

Town of Logansport was incorporated in 1934, under the provisions of the Lawrason Act. The Town operates under a Mayor-Town Council form of government. The Town's major operations include public safety, streets, recreation and parks, utilities, and general administrative services.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Accounting

The accompanying financial statements of the Town of Logansport have been prepared in conformity with governmental accounting principles generally accepted in the United States of America. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The accompanying basic financial statements have been prepared in conformity with GASB Statement No. 34, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments*, issued in June, 1999.

B. Reporting Entity

GASB Statement 14 established criteria for determining the governmental reporting entity and component units that should be included within the reporting entity. Under provisions of this Statement, Town of Logansport is considered a primary government, since it is a special purpose government that has a separately elected governing body, is legally separate, and is fiscally independent of other state or local governments. As used in GASB Statement No. 14, fiscally independent means that Town of Logansport may, without the approval or consent of another governmental entity, determine or modify its own budget, levy its own taxes or set rates or charges, and issue bond debt.

C. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the Statement of Net Assets, page 8, and the Statement of Activities, (page 9) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of the interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from the business-type activities, which rely, to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include a) charges to customers or applicants who purchase, use or directly benefit from goods, services privileges provided by a given function or segment, and b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

NOTE 1 **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements were prepared using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and the fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Ad valorem taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenue in the current fiscal period. Only the portion of special assessment receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. Sales and use tax revenues are recorded in the month collected by the tax collector. All other revenue items are considered to be measurable and available only when the cash is received by the government.

Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred. Purchases of various operating supplies are regarded as expenditures at the time purchased.

Transfers between funds that are not expected to be repaid (or any other types, such as capital lease transactions, sale of capital assets, debt extinguishment, long-term proceeds, et cetera) are accounted for as other financing sources/(uses). These other financing sources/(uses) are recognized at the time the underlying events occur.

Town of Logansport reports the following governmental and proprietary funds:

Governmental Funds

Governmental funds account for all or most of Town of Logansport's general activities, including the collection and disbursement of specific or legally restricted monies, the acquisition or construction of capital assets, and the servicing of general long-term obligations.

General Fund - is the general operating fund of the Town. It is used to account for all financial resources except those required to be accounted for in another fund. General tax revenues and other sources of revenue used to finance the fundamental operations of the Town are included in this fund. The fund is charged with all cost of operating the government for which a separate fund has not been established.

D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Proprietary Funds

Proprietary funds account for activities similar to those found in the private sector, where the determination of net income is necessary or useful to sound financial administration. Proprietary funds differ from governmental funds in that their focus is on income measurement, which, together with the maintenance of equity, is an important financial indicator. Town of Logansport applies all GASB pronouncements as well as the Financial Accounting Standards Board pronouncements issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements.

Enterprise Fund - is used to account for operations a) that are financed/operated in a manner similar to private business enterprises - where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or b) where the governing body has decided the periodic determination of revenue earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that these standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The government has elected not to follow subsequent private-sector guidance.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the governments enterprise operations. Elimination of those charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as program revenues include a) charges to customers or applicants for goods, services, or privileges provided, b) operating grants and contributions, and c) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Formal budgetary accounting is employed as a management control. Town of Logansport prepares and adopts a budget each year for its general and utility funds in accordance with Louisiana Revised Statutes. The operating budget is prepared based on prior year's revenues and expenditures and the estimated increase therein for the current year, using the full accrual basis of accounting. The Town amends its budget when projected revenues are expected to be less than budgeted revenues by five percent or more. All budget appropriations lapse at year end.

F. Cash and Cash Equivalents

For the purpose of the Statement of Cash Flows and consistent with GASB Statement 9, the Town defines cash and cash equivalents as follows:

Cash - includes not only currency on hand but also demand deposits with banks or other financial institutions and other kinds of accounts that have the general characteristics of demand deposits in that the customer may deposit additional funds at any time and also effectively may withdraw funds at any time without prior notice or penalty.

Cash equivalents - includes all short-term, highly liquid investments that are readily convertible to known amounts of cash and are so near their maturity that they present insignificant risk of changes in value because of interest rates. Generally, only investments which, at the day of purchase, have a maturity date no longer than three months qualify under this definition.

G. Receivables

All receivables are reported at their gross value and, where applicable, are reduced by the estimated portion that is expected to be uncollectible.

H. Bad Debts

Uncollectible accounts receivable are recognized as bad debts through the establishment of an allowance account at the time information becomes available which would indicate the uncollectibility of the particular receivable. At December 31, 2009, \$3,0981 and \$18,607 of Governmental and Business-Type Activities receivables, respectively, were considered to be uncollectible.

I. Capital Assets

The accounting and reporting treatment applied to the capital assets associated with a fund are determined by its measurement focus. Capital assets are long-lived assets that have been purchased that have a useful life of greater than one year. When purchased or acquired, these assets are recorded as capital assets in the Government-Wide Statement of Net Assets. In contrast, in the Fund Financial Statements, capital assets are recorded as expenditures of the fund that provided the resources to acquire the asset. If the asset was purchased, it is recorded in the books at its cost. If the asset was donated, then it is recorded at its estimated fair market value at the date of donation.

Depreciation is computed using the straight line method over the estimated useful life of the assets, generally 10 to 40 years for buildings and other improvements, and 5 to 10 years for moveable property. Expenditures for maintenance, repairs and minor renewals are charged to earnings as incurred. Major expenditures for renewals and betterments are capitalized.

J. Sales Taxes

The Town collects a one (1) percent sales and use tax with the net proceeds, after deducting costs of collection and administration, dedicated to construction, acquiring, extending, improving and/or maintaining drainage facilities, streets, street lighting facilities, bridges, sidewalks, waterworks, sewers and sewer disposal works, recreational facilities, public parks, public buildings and equipment, payment of salaries of municipal employees, maintaining and operating the municipal police department including the purchase of equipment thereof, or for any one or more of said purposes, title to which improvements shall be in the public.

K. Compensated Absences

Leave cannot be accumulated or carried over from one year to the next. Therefore, no liability for compensated absences has been recorded in the accompanying financial statements.

L. Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of the assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 2 LEVIED TAXES

Town of Logansport levies taxes on real and business personal property located within its boundaries. The Parish Tax Assessor assesses the property values and prepares the Town's property tax roll. The Town bills and collects its own property taxes. Ad valorem taxes are levied and billed to the taxpayer in December, and are payable upon receipt of notice. Ad valorem taxes attach as an enforceable lien on property as of December 31 of each year. Taxes of 7.41 mills were levied on property with assess valuations totaling 6,143,063 and were dedicated for general operating purposes. Total taxes levied after adjustments were \$49,780. Taxes receivable at December 31, 2009 totaled \$9,677.

NOTE 3 DEPOSITS WITH FINANCIAL INSTITUTIONS AND INVESTMENTS

A. Deposits with Financial Institutions

For reporting purposes, deposits with financial institutions includes savings, demand deposits, time deposits, and certificates of deposit. Under state law the Town may deposit funds within a fiscal agent bank selected and designated by the Town Council. Further, the fund may invest in time certificates of deposit of state banks organized under the laws of Louisiana, national banks having their principal office in the state of Louisiana, in savings accounts or shares of savings and loan associations and savings banks and share accounts and share certificate accounts of federally or state chartered credit unions.

Deposits in bank accounts are stated at cost, which approximates market. Under state law, these deposits must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank. The market value of the pledged securities plus the federal deposit insurance must at all times equal the amount on deposit with the fiscal agent bank. These pledged securities are held in the name of the pledging fiscal agent bank in a holding or custodial bank that is mutually acceptable to both parties. The carrying amount of the Town's deposits at December 31, 2009 including petty cash of \$600 was \$1,382,451 and the bank's balance was \$1,471,044. The difference is due to outstanding checks and deposits at year end. The banks balances were secured as follows:

| | | |
|---|----|-----------|
| Secured by FDIC Insurance: | \$ | 767,882 |
| Collateralized by securities pledged in the Town's name: | | 703,162 |

**REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT
OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE
WITH GOVERNMENT AUDITING STANDARDS**

The Honorable Katherine Freeman, Mayor
and Members of the Town Council
Town of Logansport, Louisiana.

I have audited the basic financial statements of Town of Logansport, Louisiana, as of and for the year ended December 31, 2009, and have issued my report thereon dated June 3, 2010. I conducted my audit in accordance with accounting standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing my audit, I considered Town of Logansport's internal control over financial reporting as a basis for designing my auditing procedures for the purpose of expressing my opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control. Accordingly, I do not express an opinion on the effectiveness of the Town's internal control over financial reporting.

My consideration of internal control over financial reporting was for the limited purpose described in the second paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed below, I identified a certain deficiency in internal control over financial reporting that I consider to be a material weaknesses.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Town's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Town's financial statements that is more than inconsequential will not be prevented or detected by the Town's internal control. I consider Finding #2009-1 described in the accompanying schedule of findings and questioned costs to be a significant deficiency in internal control over financial reporting.

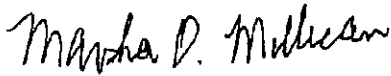

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Town's internal control.

My consideration of internal control was for the limited purpose described in the second paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, I believe that Finding #2009-1, lack of segregation of duties, is a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Town's financial statements are free of material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit and, accordingly, I do not express such an opinion. The results of my tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

This report is intended solely for the information and use of the Town Council, management, and federal and state cognizant agencies and is not intended to be and should not be used by anyone other than these specified parties. Under Louisiana Revised Statute 24:513, this report is distributed by the Legislative Auditor as a public document.
